☰ Profile

I am a mobile application developer. My area of expertise is Flutter and I have been actively involved in projects with Flutter for a long time. I am also currently working on Android development, I am doing these studies in order to master the general structure in the field of mobile applications. I often use GetX as a state management tool in my Flutter projects, and I also use Firebase, Restful APIs, WebSocket and 3rd party libraries in accordance with clean code architectures. I am someone who improves himself in the mobile field, loves research, follows current technologies, has high communication skills and is suitable for teamwork.

💼 Work experience

Flutter Developer
Devasa Bilişim, Bolu   2020 - 2022

I worked as a Flutter developer at Devasa Bilişim. During this period, I took part in the development of 3 different crypto applications. In these applications, I used GetX as a state management tool, and I also used Firebase, Restful APIs, WebSocket and 3rd party libraries in accordance with clean code architectures.

Flutter Developer
RSS Interactive, Bolu   2022 - Present

I work as a Flutter developer at RSS Interactive. I am actively involved in the development of 14 different finance applications. I use GetX as a state management tool in these applications, and I also use Firebase, Restful APIs, WebSocket and 3rd party libraries in accordance with clean code architectures. Additionally, I assume the role of leading the Flutter team in the company.
